

Mason County EMS & Trauma Council

ENTRANCE EXAM APPLICATION

All EMR and EMT class applicants must take and pass the Mason County entrance exam.

This exam is assigned and administered through our learning management system, TargetSolutions. You will be set up with a TargetSolutions account, using the email you provide below. Please make sure this is an email you have access to and check regularly. Once you receive your log-in credentials, please save them, as you will use them again throughout your EMR or EMT class.

This is closed-book, proctored exam. It must be taken in the presence of an approved test proctor with your sponsoring agency.

Upon completion of your test, please print your certificate by either taking a screen shot or photo and attach this to your application. Do not skip this step. If the computer does not register your completion, and you do not have adequate documentation, you will be required to take the exam again as if it were a failed attempt.

If you fail the test, please discuss this with your training officer. The test may be re-taken once, after a thirty day wait period. We recommend planning to take your test early in the application process to allow time for a retake prior to the class application deadline, should it be needed.
